CORE COMPETENCIES

- **Digital Modernization**
- **Cybersecurity and Compliance**
- **Risk Management Framework (RMF)**
- **Systems Integration**
- **Project and Program Management**
- **CTERA & ServiceNow Partners**

CORPORATE DATA

CAGE: 8GJP6
UEI: J1VNLN5DXHL1

SOCIO-EC: VOSB and WOSB

NAICS:
•541519 - Other Computer Related Services
•541512 - Computer Systems Design Services
•541513 - Computer Facilities Management Services
•541511 - Custom Computer Programming Services
•541611 - Administrative Management and General Management Consulting

CAPABILITY NARRATIVE

As a trusted federal systems integrator, we specialize in digital modernization and cybersecurity services. Our mission is to deliver best-in-class solutions through our agile and customer-focused approach to systems development and integration.

DIFFERENTIATORS

- Our team includes subject matter experts in cybersecurity and full-stack systems integration, with a combined 40+ years of experience serving various federal, state, local, and commercial organizations.

- Subject Matter Experts in Cybersecurity and Full-Stack Systems Integrations, with over 22 years of experience in the DoD, federal, and commercial sectors.

- We are a trusted federal systems integrator and partner to numerous technology vendors, including CTERA and ServiceNow, allowing us to deliver innovative solutions that meet the most complex requirements.

- A Cyber AB accredited CMMC Registered Practitioner Organization (RPO), we specialize in providing comprehensive and customized cybersecurity and compliance solutions, including NIST SP 800-171 and Risk Management Framework (RMF) compliance.

PAST PERFORMANCE

Defense Health Agency (DHA)
10/2021 – Present
Manages the systems design, development, implementation, sustainment, cybersecurity compliance of the Joint Longitudinal Viewer (JLV) application in support of over 800k global healthcare providers.

Department of Navy (DON)
10/2021 – Present
Manages the design, implementation, and support of the file systems modernization effort to enable the secure storage, transmission, and joint collaboration on critical datasets in disrupted, disconnected, intermittent and low-bandwidth (DDIL) environments.
